Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

This notice is to inform our customers of a PCB design change that is being implemented for all of the E4T and S4T product lines.

As part of our continuous improvement objective, the new PCBs will improve overall product performance and enhance robustness of these product lines. The new PCBs can be identified by their blue color (instead of black) and have two mounting holes that mate with the base plate instead of one hole and one slot. This change has no impact on form, fit or function of the either the E4T or S4T.

Figure 1, E4T PCB comparison showing existing design (left) vs. new board design (right).
