## Who is Fujikura?

Head Office in Tokyo

The history of Fujikura began in 1885, when Zenpachi Fujikura, the founder of the Company, produced copper wires for electronic generators through much trial and error. At the time, copper wires represented a leading-edge technology. Since the early days, Fujikura

has been expanding its business in a wide spectrum of fields, including IT, electronics and electric components.

Pressure sensors are one of product lines in Fujikura's electronics business. We have supplied pressure sensors since 1982. Our products are used in various consumer, industrial and medical applications globally. To help you deliver a successful project, We are willing to:

- Listen and support the resolution of your technical challenges.
- Provide strong technical support, samples and testing.
- Supply modified & customized products to meet your most demanding needs.
