

smartMODUL BASIC^{EVO}

 Infrared gas sensor R404a // REFRIGERANT // 1000 ppm
 smartGAS item number: B3-742105-03000

- Pre calibrated
- Gas entry by diffusion
- 3.3 - 6 V DC supply voltage
- Modbus ASCII or RTU
- Status indication by LED

Non Dispersive Infrared (NDIR) gas sensor for ambient air monitoring using dual wavelength technology. Although designed especially for refrigeration leak detection in small concentration ranges (ppm range) for wall mount detectors and room air monitoring devices the BASIC^{EVO} can also be applied in food storage facilities, air conditioning systems and various areas of scientific research.

The BASIC^{EVO} R404a sensor can easily be integrated into OEM systems, where long term stability, repeatability and reliable performance are required. It can be utilised as a refrigerant detector in industrial refrigeration facilities but can also be used for ambient air monitoring in the field of air conditioning devices. Other scopes of applications comprise continuous gas monitoring in controlled environment chambers and food storage rooms as well as usage for various areas of scientific research. Special build-in solutions to provide IP54 protection and easy field gas-calibration are available.

Modbus ASCII or RTU data communication offer a variety of options to connect the BASIC^{EVO} gas sensor to a controller.
